

Help Shape The Future Of Treatment

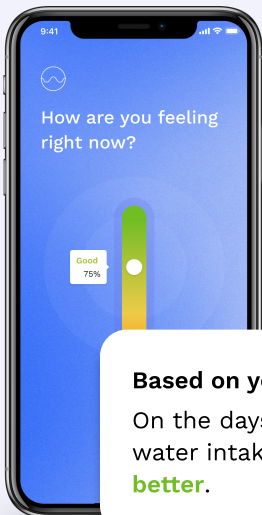

Walgreens is partnering with Wave Health to change the way patients and pharmacists take on chronic disease together.

The Walgreens & Wave Health Program

Giving you free tools to manage your treatment:

- **A Companion App** with powerful health insights.
- **Weekly Reports** of your symptoms & activities shared automatically with pharmacists.

Your input will help improve this program for future patients!

Based on your activity data...

On the days you logged higher water intake, **you felt much better.**

Ask Your Pharmacist About The Program!

Or see back for how to get started.

www.wavehealth.app/walgreens

Reporting symptoms has **life-changing** results*:

 **Improves Patient Outcomes**

 **Prevents Hospital Visits**

 **Enhances Quality of Life**

For support, please call 888-970-9536 or email walgreens@tti.care.

*Basch E, *J Clin Oncol* 34:557-565, 2016.

This opportunity is completely optional, and you can cancel at any time. We have made the QR Code available to you to help you manage your treatment. Participation in this Pilot gives you an additional tool to help manage your symptoms and entire treatment journey at home, including helping you monitor and evaluate how your current treatment is working. The Wave Health app does not replace the level of care you'll receive from your Walgreens pharmacists. In visiting the Wave Health site and/or downloading the Wave Health app, you will be engaging with a third party app that is not owned or operated by Walgreens. Any personal information (including medical information) you provide to the Wave Health app will be subject to Wave Health/TTI's privacy and security policies and is not protected by Walgreens.

Support phone line and email address are serviced by Treatment Technologies & Insights (TTI), creators of Wave Health. Please contact your Walgreens pharmacy directly with pharmacy related questions.

Wave Health Gives You Powerful Health Insights
